Claims rejection

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim17 is rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al 96,396,106).

The patent disclose a stagger type or bottom gate TFT in the front page having active source/drain regions, source/drain ohmic contacts (41) and source/drain electrodes (43,45) resulting in a composite source/drain TFT elements. The structure is further defines by forming the source/drain electrodes (43,45) using MoNb alloy thereby asserting that the overall source/drain structure as comprising the claimed material.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 18,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al.

Although the prior art discloses all subject matter claimed, it omits the composition percentage of the materials in the alloy. However, material composition is a function of resistance and conductance that vary from a designer to another depending

Art Unit: 2826

on an anticipated outcome for one skilled in the art to consider it as obvious since it is a notoriously known variable in the art.

Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-16 have been allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fetsum Abraham whose telephone number is: 571-272-1911. The examiner can normally be reached on 8:00 - 18:00.

attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nathan J Flynn can be reached at 571-272-1915.
